## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance: a search of the prior art did not reveal any clear suggestion or teaching of the claimed invention, and failed to demonstrate in any obvious combination all the limitations recited by independent claims 1 or 5. The prior art did not disclose a method for operating a cryocooler system comprising generating an oscillating gas at a frequency within the range 25 to 120 hertz using an electrically driven pressure wave generator, reducing the frequency using a frequency modulating mechanical resonator, and passing the lower frequency oscillating gas to a cryocooler for the generation of refrigeration. The prior art also did not disclose a cryocooler system comprising an electrically driven pressure wave generator, a frequency modulating mechanical resonator for receiving oscillating gas from the pressure wave generator, and a cryocooler for receiving oscillating gas from the frequency modulating mechanical resonator. Therefore all claims 1-9 are considered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Art Unit: 3744

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, all of which disclose various cryocooler arrangements.
